1. Introduction

The PL27A1 SuperSpeed USB 3.0 Easy Transfer Cable is a USB-to-USB host bridge cable that allows easy and direct peer-to-peer data transfer connection between two PCs with USB port.

The PL27A1 USB 3.0 Easy Transfer Cable is especially designed to work with the following two programs:

* Microsoft Windows Easy Transfer for Windows XP/Vista/7/8

Windows Easy Transfer (WET) program allows you to easily transfer all your files and program settings from your old Windows PC to your new Windows PC.

Windows Easy Transfer allows you to automatically copy files, photos, music, videos, emails, settings, and other files to your new Windows PC easily. For more information, go to this website: http://windows.microsoft.com/en-us/windows7/products/features/windows-easy-transfer

🍥 🤹 Windows Easy Transfer	X
Welcome to Windows	Easy Transfer
Copying files and settings from one PC	to another is easy. No info is deleted from your old PC.
You can transfer:	
User accounts	• Email
Documents	Internet favorites
Music	Videos
Pictures	And more
When the transfer is done, you'll see a lis your new PC, and links to other apps that	st of what was transferred, apps you might want to install on at you might want to download.
Tip: If you're upgrading this PC to Wind Windows" and "new PC" as referring to	ows 8, think of "old PC" as referring to your "old version of your "new version of Windows."

Prolific PCLinq5 for Windows XP/Vista/7/8/8.1

PCLinq5 is a user-friendly file manager program that allows you to see and control file directories on both PCs at the same time. You can easily drag-and-drop or cut-and-paste files and folders between PCs as well as creating new folders and changing file attributes. You can also open any files from the remote PC and display on your local PC including photos and videos. PCLinq5 requires Windows Easy Transfer drivers for Windows XP, Vista, 7, 8, and 8.1 which is built-in except in Windows XP.

Prolific PCLinq5 for Mac OS X 10.7/10.8/10.9

PCLinq5 for Mac OS X is a user-friendly file manager program that allows you to see and control file directories on both Mac OS X PCs at the same time. You can easily drag-and-drop or cut-and-paste files and folders between PCs as well as creating new folders and changing file attributes. Mac OS X PCs running PCLinq5 for Mac can also link and transfer files with Windows PCs running PCLinq5 for Windows.

2. Features & Specifications

- > Transfer files and settings between 2 PCs via USB port (USB 3.0 recommended)
- > Supports 5GHz SuperSpeed, 480MHz Hi-Speed, and 12MHz Full-Speed USB mode
- > Dual data buffer supports two-way data transfer (using Prolific PCLinq5 program)
- > Works with Microsoft Windows Vista/7/8 built-in Windows Easy Transfer (WET) program
- Prolific PCLinq5 for Windows software (XP/Vista/7/8/8.1)
- Prolific PCLinq5 for Mac OS X software (Mac OS X 10.7 and above)
- Suitable for Mobile PC and SOHO environment
- ▶ Full Compliance with the Universal Serial Bus Specification 2.0 and 3.0
- Bus Powered from either USB port no separate power required

3. System Requirements

- > For Microsoft Windows Easy Transfer (WET) program:
 - One source computer (old PC) running Microsoft Windows XP SP3, Vista, 7 or 8, and one target computer (new PC) running Windows Vista, Windows 7, Windows 8, or Windows 8.1.
 - NOTE: Windows Easy Transfer program only supports Windows XP, Windows Vista,
 Windows 7, and Windows 8. Windows Easy Transfer also cannot transfer files from a
 64-bit version of Windows to a 32-bit version of Windows.
 - Download new Windows Easy Transfer program for Windows XP and Vista here: http://windows.microsoft.com/en-us/windows7/products/features/windows-easy-transfer
 - Must log on as Administrator
- > For Prolific PCLing5 software (Windows version):
 - Two computers running either Microsoft Windows XP SP3, Vista, 7, or 8.
 - IMPORTANT: For Windows XP, Microsoft Windows Easy Transfer program must first be installed and the USB Easy Transfer Cable detected before installing the PCLinq5 software.
- > For Prolific PCLing5 software (Mac OS X version):
 - Two Mac computers running Mac OS X 10.7, 10.8 or 10.9.

> Other PC requirements:

- For Windows 8.1: USB Flash Drive (or USB Hard Drive) for copying the Windows Easy Transfer program for Windows 7 or Windows 8 compatible.
 - NOTE: The Windows 8.1 Easy Transfer program does not include support for Easy Transfer Cable devices. You should copy and run the older version from Windows 7 or 8.
- At least 200MB of hard disk space must be available
- One USB 1.1 or USB 2.0 or USB 3.0 (recommended) port for each PC

4. Using the Windows Easy Transfer Program

These are following steps for running the Windows Easy Transfer (WET) program when migrating from:

Old Windows PC	New Windows PC
Windows XP or Windows Vista or Windows 7 or Windows 8	Windows 7 or Windows 8

NOTE: Windows Easy Transfer program cannot transfer files from a Windows 64-bit version to a Windows 32-bit version.

 If your old PC is running Windows XP or Vista, you will need first to install the Windows Easy Transfer for Windows 7 program. You can download here and choose the correct version and language: http://windows.microsoft.com/en-us/windows7/products/features/windows-easy-transfer

2. After installation is complete, plug-in the USB Easy Transfer Cable to the USB port of the old PC. The Easy Transfer Cable auto play window will pop out for you to run instantly. Click Cancel first.

5. How to Use Windows Easy Transfer in Windows 8.1

These are following steps for running the Windows Easy Transfer (WET) program in Windows 8.1:

NOTE: The Windows 8.1 Easy Transfer program does not include support for Easy Transfer Cable devices. You should copy and run the older version from Windows 7 or 8 which is compatible with Windows 8.1.

1. You will first need a computer running Windows 7 or Windows 8 to copy the Windows Easy Transfer program. Run Windows Easy Transfer program. You do not need to plug the Easy Transfer Cable.

🧼 🤹 Windows Easy Transfer	×
Welcome to Windows	Easy Transfer
Copying files and settings from one PC	to another is easy. No info is deleted from your old PC.
You can transfer:	
User accounts	Email
Documents	Internet favorites

With PCLinq5, you can control both the local and remote PCs and do the following:

- (1) Display files/folders
- (2) Open files/folders
- (3) Create files/folders
- (4) Delete files/folders
- (5) Copy/Cut/Paste files/folders
- (6) Move files/folders
- (7) Change file/folder names/attributes

To start using the PCLinq5 program:

- 1. Run PCLinq5 on both computers (local PC and Remote PC).
- 2. Plug one end of the Easy Transfer cable into the USB port of the local PC and the other end into the USB port of the remote PC.
- 3. Wait for Windows to detect the cable on each computer and check if it is properly installed. Check the Connection Status LED on the bottom right of the program dialog box if it is ready or not. A green LED signifies a ready status while a red LED means not ready or not found. Make sure that the program shows two green LEDs to indicate a linked connection.

4. Once a connection has been established, you simply drag-and-drop the files or folders you want to transfer to the other computer. You can change disk drives or directories by clicking on the pull-down directory menu. You can also use the Menu Controls for other functions of the program.

NOTE: You may not be able to drag-and-drop some folders and files from Windows Vista/7/8 to Windows XP due to Windows Vista/7/8 permission security feature. Permissions are rules associated with objects on a computer or network, such as files and folders. You would need to grant permission or ownership first to those files/folders for you to be able to transfer them from your Windows Vista/7/8 to Windows XP computer if needed. Another solution to this problem is to use your Windows XP computer to drag the files/folders from Windows Vista/7/8 to XP.

5. Right-click the file or folder (example: Pictures) in Windows Vista/7/8 PC, and then click Properties. Click the Security tab and click Edit to change permissions.

9. PCLinq5 also allows you open/run files directly found in the remote PC without needing to copy the files to your local PC. You can directly play movie files located in the remote PC.

10. PCLinq5 also provides Options to show hidden, read-only, system files and directories.

Options	x

8. Uninstalling the PCLinq5 Program (Windows version)

It is easy to uninstall the PCLinq5 program:

- 1. Make sure to first unplug the Easy Transfer cable and close the PCLinq5 program.
- 2. Go to Control Panel and double-click on Add or Remove Programs. Look for the PCLinq5 program and click Remove button.

🐻 Add or Re	move Programs

 The PCLinq5 InstallShield Wizard program will appear and let you choose if you want to Modify, Repair or Remove installations. Click the Remove button selection to remove all installations. Make sure that you have unplugged the Easy Transfer cable and click Next to continue.

4. The PCLinq5 InstallShield Wizard program will confirm with you if you really want to completely remove the application and features. Click Yes to uninstall.

9. Installing the PCLinq5 Program (Mac OS X version)

This section guides you on how to install the PCLinq5 for Mac OS X. PCLinq5 is a user-friendly file manager program that allows you to transfer and control file directories on both Mac OS X computers at the same time. Computers running PCLinq5 for Mac can also link and work with PCs running PCLinq5 for Windows.

1. Plug the USB Easy Transfer Cable to the USB port of the Mac OS X computer. A removable drive will appear on the desktop screen.

2. Double-click on the drive and look for the PCLinq5 for Mac folder. Click on PCLinq5 dmg program.

00	0	PClinq5_Mac_20140606		
Name	۸	Date Modified	Size	Kind
MACOSX		Jun 9, 2014, 4:41 PM		Folder
PClinq5-20140606.dmg		Jun 6, 2014, 11:49 PM	611 KB	Disk Image
				_

3. The PCLinq5 for Mac OS X installation window will appear. To install the program, simply click on the PCLinq5 icon and drag it to the Applications folder.

4. Go to the Application folder and check if the PCLinq5 program has been copied successfully. You can drag the PCLinq5 program to the Dock desktop screen for quick access.

10. Running PCLinq5 (Mac OS X version)

PCLinq5 for Mac is an application program used to control the file sharing and data transfer of the linked computers running Mac OS X (also known as the local computer and the remote computer). After you have successfully installed the program and plug-in the USB Easy Transfer cable in both computers, simply double-click and run the PCLinq5 program in both computers. The PCLinq5 for Mac will appear as follows:

[Local] / 0 J000's iMac Data File Name Si: 0 @ [MV]Girls' Ge 73	ze Attribute	▼ My Doc \	[Remote] D:/GHOS	ST/W7x64SP1

With PCLinq5, you can control both the local and remote computers and do the following:

- (1) Display files/folders
- (2) Create files/folders
- (3) Delete files/folders
- (4) Copy/Cut/Paste files/folders
- (5) Move files/folders
- (6) Change file/folder names and attributes
- (7) Connect and disconnect transfer link

To start using the PCLinq5 for Mac OS X program:

- 1. Run PCLinq5 on both computers (Local computer and Remote computer). You can also connect from a Remote PC with Windows OS running PCLinq5 for Windows.
- 2. Plug one end of the Easy Transfer cable into the USB port of the local Mac computer and the other end into the USB port of the remote computer.
- 3. Wait for PCLinq5 to detect the cable on each computer and check if it is properly installed. Check the Connection Status LED on the bottom right of the program dialog box if it is ready or not. A green LED signifies a ready status while a red LED means not ready or not found. Make sure that the program shows two green LEDs to indicate a linked connection.

4. Once a connection has been established, you simply drag-and-drop the files or folders you want to copy to the other computer. You can also change disk drives or directories by clicking on the pull-down directory menu. During file transfer, you will see a progress bar appear below the program window and the percentage completion status.

[Local] /					[Remote] F:/GHOST2/Win81x64/Win81001.GHS						
0 J000's iMac 🔹					1 J000

6. You can also use the Menu Bar controls for other functions of the program like cut/copy/paste, delete/move/copy, and create/rename/refresh functions. These functions are very straight-forward and easy to use and understand. You can also click Disconnect to temporarily disconnect the link connection. Click Exit to close the program.

NOTE: You may not be able to drag-and-drop some folders and files from Windows Vista/7/8 due to new Windows permission security feature. Refer to Running PCLinq5 for Windows for more information. Another solution is to use your Mac OS X computer to drag the files/folders from Windows Vista/7/8 to your Mac OS X computer.
