Hall IC

PT3665 Hi-Sensitivity Hall-effect Switch

Package Type

Applications

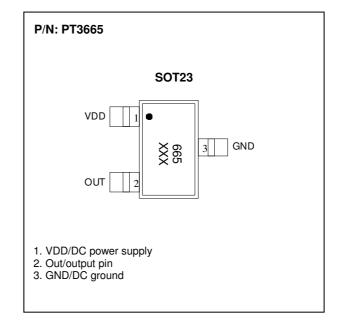

- Cover detector
- Battery-operated
- Hand Held Equipment

Features

- 2.4V to 5.5V operation range
- Built-in dynamic offset cancellation
- Small size
- · High balance and low thermal drift magnetic sensing
- ESD protected to 5KV(HBM)

Order information

• PT3665 /PKG:SOT23

All PROLIFIC products described or contained herein do not have specifications that can handle applications require extremely high levels of reliability, such as life-support systems, aircraft control systems, or other applications whose failure can be reasonably expected to result in serious physical and/or material damage. Consult with your PROLIFIC representative nearest you before using any PROLIFIC products described or contained herein in such applications.

PROLIFIC assumes no responsibility for equipment failures that result from using products at values that exceed, even momentarily, the rated values (such as maximum ratings, operating condition ranges, or other parameters) listed in products specifications of any and all PROLIFCI products described or contained herein.

General Specifications

The PT3665 is designed for battery-operated, hand-held equipment such as cellular and cordless phone, PDA and pagers application. The built-in dynamic offset cancellation of pre-amplifier stage achieves optimal symmetrical magnetic sensing.

This Hall effect sensor IC integrate a sensor, pre-amplifier with dynamic offset cancellation and the differential hysteresis comparator in single chip . The architecture block diagram is shown in Fig. 1.
